Objective

I want to continue my work with computers and programming languages before I move into college. Working with students, other interns, and employees will continue my learning with computers and teaching.

Experience

Shodor Computational Science Foundation - Apprentice 2013-Present

At Shodor, I gained a lot of experience with computers and scripting languages. I also started to

Global Volunteers 2011

I went with my twin brother and mother to a small village outside of Iringa, Tanzania. I primarily taught primary school and did manual labor. I learned a lot from my time in Africa and loved every video. This program helped improve my teaching and managing skills greatly and I had a great life experience.

High School Model United Nations – Vice President 2012-Present

My work in Model UN has helped me learn what is needed to take on the leadership position. I wrote speeches and position papers on any given topic and presented them in front of large audiences. This program has sparked my interest in international relations and public speaking.

Education

Chapel Hill High School 2012-Present

I am currently a junior at Chapel Hill; I mainly focus on history and computer science. I am taking AP US history, AP biology, Audio Engineering, Honors English, Honors Pre-Calculus, and Honors Spanish Four. I am also a member of our schools environmental group Green Tigers and our Ultimate Frisbee Team.

Mcdougale Middle School 2009-2011

I had a good Middle School Middle School. I started Model UN in Middle School and several other programs like working with computers.

Skills

Through out my time in Shodor and High School I learned a number of helpful skills that can be applicable in many work place environments. The scripting languages I have learned include HTML, CSS, JavaScript, PHP, and some other programs including Agent Sheets and Vensim.
