

# Personal Website High Level Design (HLD) Document

## 1. Introduction

You need a website to show off your skills at HTML and CSS. You need a well-designed responsive page that explains who you are and show what you can do. This is good practice and is a use fool tool in your portfolio.

## 2. Subject Matter Experts Agreement List

Name	Title/Role	Mandatory Reviewer (Y/N)	Approved
<i>Apprentice name</i>	Developer	Y	
<i>Phil List</i>	Supervisor	Y	
<i>Eric Horton</i>	Intern-apprentice wrangler	Y	
<i>Mentor</i>	Mentor	Y	

## 3. Requirements

Your goal for this project is to create a visually appealing and well working website. You are required to write with HTML and CSS but you may add PHP or JavaScript if you want. The site must have a Home page with a description of who you are, a blog page for your daily dealings and weekly reflections. It must also include a portfolio page contains all of your work from Shodor.

## 4. Timeline

This project is due at the end of the Spring Session. You must have completed the tutorial by the end of December and show it to your mentor. Over the summer you are required to continue work and add improvement making your site as good as possible.

## 5. Desired Behavior / Components

Your site must have a mobile version that changes the look of the website so it can easily be viewed from a phone. It also must have link to and from your different pages and the Shodor Recourses.

**Example: Washing the dishes.**

- a. Home Page with description**
- b. Blog page that is updated regularly**
- c. Portfolio page**
- d. Personal Logo**
- e. Mobile Version**
- f. Functional and Visually appealing**

## **6. Conclusion**

The goal of this activity is to create a well-designed and functional site that shows off your work in skill to friends and future employers.
